

Thank you for purchasing a mod spring of Blasterparts. Here is a short guide you through the most important steps for the installation of the spring into your foam-gun.

1. Open the blaster by losing all screws of the housing. In mechanical blasters there are often screws hidden under the sled. To remove these you have to slide it to another position.

Note: Make sure to remove screws with a matching screwdriver. If the screws are worn out it gets pretty difficult to remove them.

2. Once the blaster is open take out the cylinder (plunger), bolt-sled and catch.

3. Now the stock-spring has to be replaced with the provided mod-spring.

Notes: The modification-spring may have a different geometry compared to the stock-spring. E.g. it may be longer or has a different diameter. This is intentional. All our mod-springs are designed for fit into the blasters they are meant for and have been tested.

4. After all parts are returned to their original positions the blaster can be closed again. When there is a sled make sure it is in the correct position.

5. Before you put all of the screws into the case again just put in a few screws and check functionality of the Blaster. 3-4 screws should be sufficient for that issue.

Note: Don't turn in the screws too tightly. Maybe you won't be able to remove the screws a second time

If you have any questions have a look on our website at FAQ, or send us an email to info@blasterparts.de.

If there occur any problems during installation you can also contact us over our support-area at www.blasted.de.

Blasterparts Modding-Products

Blasterparts Modification-Kit for	equivalent mass	approximate range *
-Tactical Range-		
Recon CS-6	5kg	15-20m
Raider CS-35/CS-6	5kg	15-20m
-Hard Range-		
Recon CS-6	6kg	20-25m
Raider CS635/Cs-6	6kg	20-25m
Inhalt:		
1x Modding-Spring 1x Modding-Plunger 1x Catch-Spring 1x O-Ring		

Blasterparts Modification-Kit for	equivalent mass	approximate range *
-Tactical Range-		
Alpha Trooper CS-12	7kg	25-30m
Rampage	7kg	25-30m
Retaliator	7kg	25-30m
-Hard Range-		
Alpha Trooper CS-12	8kg	30-35m
Rampage	8kg	30-35m
Retaliator	8kg	30-35m
Inhalt:		
1x Modding-Spring 1x Catch-Spring 1x Guiding-Shell		

Blasterparts Voltage-Mod-Kit for	approximate range *
Nerf N-Strike	
Stampede ECS-60 ^{1,2,3,4}	20-25m
Vulcan/Havoc Fire EBF -25 ^{1,2,4}	15-20m
Barricade REV-10 ¹	15-20m
Rayven CS-18 ¹	20-25m
Nerf N-Strike Elite	
Stockade ¹	20-25m
Stryve ¹	20-25m
Hail-Fire ¹	20-25m
Rayven CS-18 ¹	20-25m
Rapidstrike CS-18 ^{1,4}	20-25m
Nerf Dart Tag	
Speedswarm ^{1,2,3}	15-20m
Swarmfire ^{1,2,3,4}	15-20m
Nerf Vortex	
Nitron ^{1,4}	20-25m
Inhalt:	
1 Li-Ion-Battery + Dummy Battery 2 Modding-Spring 3 Catch-Spring 4 Battery-Adaptors for AA-cells	

Blasterparts Modification-Kit for	equivalent mass	approximate range *
Nerf N-Strike		
Alpha Trooper CS-18	5kg	15-20m
Nite Finder EX-3	6kg	20-25m
Stampede ECS**	9kg	20-25m
Vulcan EBF**	7kg	15-20m
Recon CS-6***	5kg	15-20m
Maverick Rev-6	6kg	10-15m
Longshot CS-6	9kg	20-25m
Raider CS-35***	5kg	15-20m
Longstrike CS-6	5kg	15-20m
Deploy CS-6	5kg	15-20m
Spectre Rev-5	6kg	15-20m
Reflex IX-1	5kg	15-20m
Element EX-6	7kg	20-25m

Warning: This product is NOT a toy and is not suitable for children!

Additional Information

The modification springs offered by Blasterparts are neither official products of nor affiliated with the original manufacturer / distributor of the named blaster.

Modifying your dartblaster in any way happens at your own risk. We would like to point out that the offered dartblasters are explicitly not intended for modifications (e.g. installing a stronger spring) by the manufacturer. Installing one of our modification brings a considerable boost in performance. If you use a modified dartblaster while playing with other persons, for example in a "nerf war" or a Live Action Role Playing game, you have to wear a pair of safety goggles. Never aim at the eyes or face of another person. In addition to installing our modification spring the so called "air restrictor" can be removed. Due to safety reasons we explicitly advise that you do not modify the blaster any further technically. Local weapon laws may apply after modifying your blaster in technical or even certain optical ways.
